Judy-Ann,
I know this matter has a long history. Please look into any actions we have taken and to the points made on the incoming. Thanks.
John

Dear Judith and Joan:

I hope this email finds you well.

Recently the Town Board of the Town of Ramapo adopted a Findings Addendum without a supplemental EIS related to Scenic finally having obtain a JD from the corps.

In reviewing this Findings Addendum we hired two specialists who wrote reports for ROSA4Rockland related to the wetlands and a threatened species that had been found and we had an engineer map a few points on the map to determine specifically where a bat study in 2008 had taken place.

We have attempted to contact the FWS regarding the threatened bat species that had been found in the federal wetland area and are awaiting a return call.

We understand the developer may have already received a new ESA waiver from the EPA, even though the developer did not notify the EPA or FWS about the threatened bat species.

Therefore, we wanted to just make sure EPA was aware of this matter.

If you would prefer printed copies to you please let me know. Please Note, the document provided by S. Gross is unsigned. we are still awaiting a scan of the signed document; if at anytime it is pertinent we can provide a signed copy.

Best wishes,

Susan Hito Shapiro, Esq.

Dear Ms. Handell,

I hope this email finds you well.

Recently the Town Board of the Town of Ramapo adopted a Findings Addendum without a supplemental EIS related to Scenic finally having obtain a JD from the corps.

In reviewing this Findings Addendum we hired two specialists who wrote reports for ROSA4Rockland related to the wetlands and a threatened species that had been found and we

had an engineer map a few points on the map to determine specifically where a bat study in 2008 had taken place.

We have attempted to contact the FWS regarding the threatened bat species that had been found in the federal wetland area and are awaiting a return call.

It is obviously the intent of the developer to avoid applying for any ACOE permits but in the event that they do, we wanted to just take sure the enclosed documents are in the file in case any coordination with the FWS is necessary.

If you have a problem with printing them to add to the file and would prefer that mail printed copies to you please let me know. Note, the document provided by S. Gross is unsigned. I am still awaiting a scan of the signed document; if at anytime it is pertinent I can provide a signed copy.

Best wishes,

Deborah Munitz
